Title: The Impact of AI on DBA research and dissertation writing

Brief description (4-5 sentences): Will DBA dissertations eventually be written by AI? This panel discussion will examine the impact of AI on DBA dissertations and the possibility that current AI tools can be used to put together a lengthy, coherent, and defendable thesis. AI could help DBA students write a first draft or a literature review, but can it help in analyzing data and generating new knowledge, and will it make writing DBA dissertations easier? What are the biases and ethical concerns in using AI to advance research?

Name of chairs and email addresses: Lynne Andersson & Pallavi Chitturi (Co-chairs). lynne.andersson@temple.edu, chitturi@temple.edu

Panel participant names, university affiliation, and email addresses: Susan Mudambi, TL Hill, both of Temple University. tl.hill@temple.edu, susan.mudambi@temple.edu
